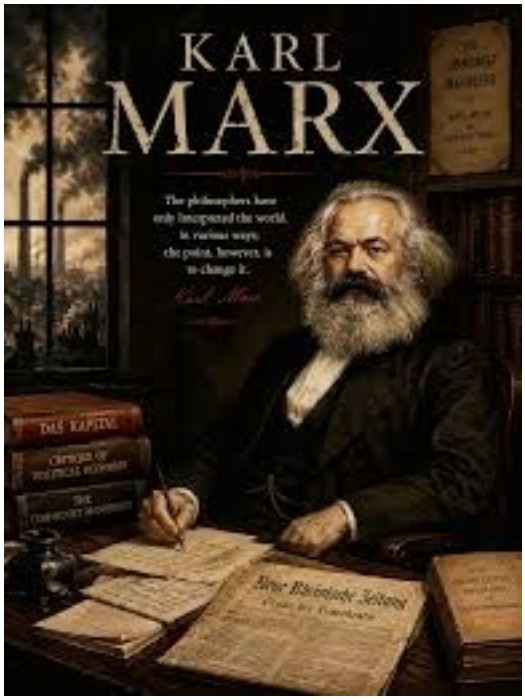
Selections of David Harvey on Karl Marx



By David Harvey (Karl Marx 1800s and 1860s even finally 1880s)

I. Auto-matic computer (Fragment on Machines changed by Harvey a bit)

By Karl Marx (1861 – 1880 on Grundrisse and Capital united)

I mean to articulate culture to computer working.

I also mean free association by computer combinations.

II. Praxis and Fundamentals of Labour Politics, and Labour Laws in the Parliament

By Karl Marx (1821)

I mean promote praxis after the computer labour.

III. My Dreams

By Karl Marx (1867 – 1871 and the meaning of Marxist Living Culture Finally)

To be a Marxist is to be with a company and work for a company and then in fact live rich and be an artistic curator and finally go to the people or poor. Just this unity of company and factory I call combinations of labour and combinations of those in finance following the labour praxis by means of attacking it perhaps but meaning goodwill.

The same life of labour and money-owners.
